NEWSLETTER

Dear friends and colleagues,

INCEPT is growing – we can welcome new sites in Danderyd (SE), Tampere (FI) and Nykøbing Falster (DK), all have enrolled their first participant – well done!

INCEPT is also growing in the number of participants – on the overview in EasyRF we can now see the estimates for the enrolment cut-off for the first adaptive analysis in both domains. This means that you're doing an AMAZING job!

We have an informal online network meeting every quarter (next one is 16 December) where we have broader academic discussions around INCEPT, including new domains. We will invite the broader group to inform and involve those interested (it's by no means mandatory).

Important notes

For the next safety analysis in Thrombo, we will send out data validation queries on October 30 and November 6 (a 'warning' has been emailed to all sites). Hence, day forms up to 30 days should be finalized for all participants enrolled up till 1 October.
And it's very important that events are updated (re-locations, re-admissions and deaths), so that the right number of day forms are generated.

We have reached out to some of you specifically about this – thanks for the swift corrections!

For new sites, please ask research staff, including coordinators/nurses to sign up to the newsletter on the INCEPT website.

The deadline for issuing case money invoices is **15 December 2026.**

Updates

Data

Some sites may experience delays from form loading. We are continuously working on improving EasyRF.

Funding

The team in Aalborg received a good amount of funding for the upcoming INCEPT-Dope domain on pleural drainage in ICU patients with pleural fluid and respiratory failure – huge congratulations to Olav and team!
We are waiting for reply from 2 foundations re. more funding for Albumin.

Clinical domains

Albumin domain

A manuscript reporting on the domain feasibility results has been submitted. These are the first results from INCEPT to be submitted. We'll share them with you soon.

We enrol a bit less than 2 participants/day, meaning that we are behind the estimated timeline. However, recruitment will increase if Danish sites continue at current pace and more international sites join.

Thromboprophylaxis domain

A manuscript reporting on the domain feasibility results is being drafted. For those of you who qualifies for authorship, we'll send it around soon.

We have an IDMSC safety meeting coming up 3 December, hence, the validation queries mentioned above.

Enrolment overview

Upcoming events

- INCEPT/Easy-RF Workshop, November 20, 2026.
- Introduction to advanced Bayesian adaptive trials: design and analysis, November 27-28, 2026
- INCEPT Platform management committee meeting: November 25, 2026
- INCEPT Platform network meeting: December 16, 2026

If you have any ideas, suggestions, or updates to coming or previously discussed domains not listed above (i.e., domains that are early in the planning phase), that you would like to discuss at future meetings, please reach out to Morten (morten.hylander.moeller@regionh.dk).

With collegial regards,

The INCEPT Coordinating Group

Anders Granholm, Anders Perner, Morten Hylander Møller, Maj-Brit Nørregaard Kjær, and Rikke Faebo Larsen
